(54) DRAWING INFORMATION MANAGEMENT SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a drawing information management system that can complete information in a proper form.

SOLUTION: This drawing information management system generates attached information in an electronic data format such as a sound, a moving picture, and a still picture relating to drawing information by an information generation part 1 in addition to drawing information in electronic data format, and the generated attached information is stored and managed by an information storage and management part 2 while related with the drawing information; and an information output part 3 reads and outputs the drawing information and attached information at any time. Consequently, the new attached information different from the drawing information can speedily and accurately be taken out and is added without placing any burden on engineers, so the information can properly be completed.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's

decision of rejection]

[Date of extinction of right]
